COMPTROLLER AND AUTHORITY AGREE TO FUNDING ON PIER A PLAZA

By Matthew Fenton

The Battery Park City Authority (BPCA) has reached an agreement with City Comptroller John Liu that will allow construction to resume on the plaza in front of Pier A, at the community's southern border. Work stopped on the plaza in September, because of a funding disagreement between the Authority, which is redeveloping Pier A on behalf of the City's Economic Development Corporation (EDC), and Mr. Liu's office, which has the authority to veto capi-

## Eyes To The Sky

A beautiful view of Mercury and Saturn in the eastern, predawn sky on Tuesday, November 26. EarthSky Facebook friend Jann Peter Normann captured this over Oslofjord, Norway.

## SONG OF THE MORNING SKY WITH FOUR PLANETS

On a singing clear morning a gem of light is to be found in the soft blue blanket that is Earth's atmosphere. It is planet Jupiter, visible rather high in the west until quarter to 7, when it is overwhelmed by daylight. Best to locate the namesake of the king of the gods earlier so that you may enjoy the challenge of finding it in daylight, just before sunrise. The sun rises at about 7 in the coming days.

Find Sirius the Dog Star, the brightest true star visible in the Northern Hemisphere, close to the horizon below and left, south, of Jupiter at about 6:20. The second brightest star in our skies, red-orange Arcturus, is opposite Jupiter, quite high in the east and visible into twilight.

Planet Mars, not so bright, is best seen by 6:20, a tawny radiance mid-sky in the south, at the top of a diagonal line of dignitaries. Bright star Spica shines below and to the left of Mars followed by planet Saturn, which is low to the southeast horizon. Below Saturn, at the end of the diagonal span, shines Mercury, brightest of all. Saturn recently began to climb into the morning sky, whereas Mercury is near the end of its morning apparition. The messenger of the gods persists even as the horizon brightens to a pale peach with the sun's approach.

Comet ISON, the visitor from the outer edge of our solar system that brought sky gazers back to celestial mornings, did not survive its turn around the sun. It was anticipated to appear, perhaps to the naked eye, near Mercury and Saturn in early December. Find an unobstructed view to the east-southeast horizon under clear skies to revel with the planets and the memory of the once-deemed Comet of the Century.

#### Money for Nothing: Inside the Federal Reserve

Screening and Q&A with Producer/Director Jim Bruce and Dr. Richard Sylla. 100 years after its creation, the power of the Federal Reserve has never been greater. Markets around the world hold their breath in anticipation of the Fed Chairman's every word. Yet the average American knows very little about the most powerful financial institution on earth. "Money For Nothing: Inside The Federal Reserve" is the first film to take viewers inside America's central bank and reveal the impact of Fed policies - past, present and future - on our lives. As Ben Bernanke's tumultuous tenure comes to a close, join Paul Volcker, Janet Yellen and many of the world's best financial minds as they debate the decisions that led the global economy to the brink of collapse and ask whether we might be headed there again. \$5. 5:30pm-7:30pm. Museum of American Finance, 48 Wall St. www.moaf.org

#### Lola Bensky

Author Lily Brett in conversation with Liel Leibovitz, senior writer, Tablet Magazine. Australian rock journalist Lily Brett rubbed elbows with Mick Jagger, Jimi Hendrix, and The Who, but started her life in a German DP camp- the child of Auschwitz survivors.

#### Building Seagram

Author Phyllis Lambert will present her new book Building Seagram, published by Yale University Press. The presentation will be followed by a conversation with Museum Director Carol Willis. The Seagram building rises over New York's Park Avenue, seeming to float above the street with perfect lines

of bronze and glass. Considered one of the greatest icons of twentieth-century architecture, the building was commissioned by Samuel Bronfman, founder of the Canadian distillery dynasty Seagram. Bronfman's daughter Phyllis Lambert was twenty-seven years old when she took over the search for an architect and chose Mies van der Rohe

Looking south from the top of Four World Trade Center, an observer could be forgiven for imagining that the view is so vast as to make visible the curvature of the Earth. This is an illusion created by the arched deck of Verrazano-Narrows Bridge. But that span is so long, and its towers so tall, that they do take into account the planet's roundness: Its twin spires are slightly more than 1.5 inches farther apart at the tops than at their bases.

#### Experiencing Death: An Insider's Perspective

For millennia, human beings have wondered what happens when we die. What is the first-person experience of dying and being brought back to life? Technological advances in resuscitation science have now

added an intriguing new chapter to the literature of "out of body" or "near death experiences" by eliciting detailed and vivid accounts of those who have approached the threshold of death. However we might seek to explain such phenomena, it is no longer tenable to simply dismiss this accumulating body of firsthand experiences. What can we
